Arya

Enhanced Extruded Floating Feed

FINS TECHNOLOGY

Fish Immunity, Nutrition and Survivability Technology

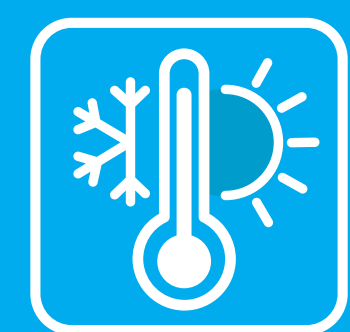

The base feature of Aquamax that aims to improve the overall status of fish by providing optimum nutrition for growth and functional ingredients for enhancing immunity.

NUTRICON

Nutrient Conversion Technology

A support feature that targets the highest nutrient retention in fish by improving Nutrient Bioavailability and Gut condition for ease of absorption.

CLIMAPRO

Climate Resilient Program

A special feature that targets to strengthen fish defense systems against environmental and biological stress.
