| 21 days FEEDING DURATION | 67 days NUMBER OF DAYS | 26 days FEEDING DURATION | 28-30 days FEEDING DURATION | within 5-7 days FEEDING DURATION | | |
| For embryonic death prevention | For optimum fetal development | For giving birth to healthy piglets | For adequate milk supply | For body conditioning | For development of reproductive organs/system and bone mineralization | Over-all development, body maintenance and optimum production of quality semen |

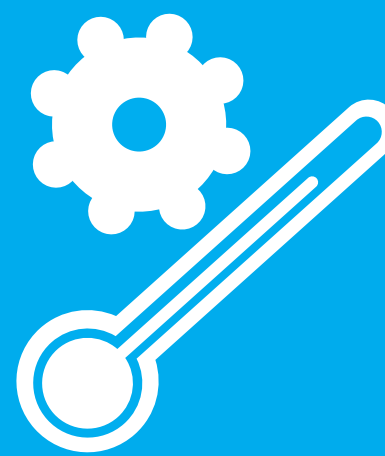

Pilmico’s feed mills implement stringent biosecurity protocols to prevent the entry of pathogens; assuring safe products.

Pilmico selects its raw materials carefully where both quality and safety are considered to provide the best results.

Pilmico does not use any animal-derived materials to ensure feed safety and quality.

Pilmico feeds undergo the necessary temperature and treatment to kill residual and harmful organisms.
